

FOR IMMEDIATE RELEASE

Pickup Tone Multiplier™ T2-Board KIT Gives 6 Pickup Tones on ALL 2-pickup coil Instruments

Detroit, Michigan, July 4, 2011

Just released – This **Pickup Tone Multiplier™ T2-Board KIT** switching system lets you **Hyper-Mod™** your 2-pickup coil *right-hand* or *left-hand* electric guitar, bass and other instruments to instantly get 6 Pure Virgin Analog pickup tones out of your instrument. This product now gives you the *ultimate* way to generate more pure virgin analog pickup tones – a capability that was previously unavailable anywhere. *This board has also been designed to permit transparent Gibson product upgrades.*

The T2-Board is based on **AweSome Musical Instruments** revolutionary patented **Pickup Tone Multiplier™** (PTM) switching system. With only three switches on a 1” x 1.75” board, this product lets you instantly get *100 percent more pickup tones* out of your instrument. This product gives you more pickup tones (a total of 6 pickup tones) to better able to find that *elusive Signature Sound* you desperately want.

This KIT version is for the *Do-It-Yourselfer* and easily fits in virtually every 2-pickup coil instrument including

- instruments with two single-coil pickups,
- instruments with one 4-wire humbucker pickup

The T2-Board KIT includes a solderless terminal strip to let you connect your two pickup coils and controls for easy installation. Installation instructions are available via download, as well as many useful white papers from their growing document library.

AweSome Musical Instruments products are built around their *unique Pickup Tone Multiplier™* switching system that lets you dramatically increase the Pure Virgin Analog *tone power* of your electric guitar or bass.

This product *instantly* converts your instrument and elevates it to an entirely new level. It will let you emulate a huge number of well-known, famous sounds from your modified instrument and eliminate the need to change instruments for a particular sound or style. The pickup sounds you get will depend on the pickups you are using.

Are More Pickup Tones Important? In a word, **YES!** If it were *not* important, you would only be buying 1-pickup instruments. You really want *more* choices. When your 2-pickup coil instrument is equipped with this **Pickup Tone Multiplier™** switching system, you can select any of the 6 unique pickup tones that you need to *precisely* blend in with the group, and use a different pickup tone that lets you "stand out" and be noticed and unique. This is the only product that gives you 100 percent *more* Pure Analog pickup tone choices.

With *more* pickup tones, you are better positioned to create your unique **Signature Sound** that lets you rise above all the others. When you have an upgraded instrument that can generate 6 pickup tones you have a huge advantage over your competitors who only have 3 or 5 pickup tones. This is a product for **serious session** and *other* musicians who need a “Grand Canyon Wide” range of pickup tones to stand above everyone else.

Even **Les Paul** had great difficulty finding the "right" pickup sound. He said, *"You can spend a lifetime on each individual sound that you wish to create, and there are so many variables that you'll be chasing a sound that you'll probably never find. I'm 90 years old, and I've never found it yet. What I did do is find the best sound for a particular moment."* — December 2005

Bottom line: This **Pickup Tone Multiplier™** switching system is a far superior way for you to *instantly* explore all the sound possibilities that you can get out of your existing instrument. It is arguably the greatest invention since Les Paul invented the solid body electric guitar in 1941.

AweSome Musical Instruments is company based in the Detroit, MI suburb. They have dozens of **Hyper-Mod™** products that are based on their *revolutionary* patented **Pickup Tone Multiplier™** switching system. These products are proudly made in the U.S.A. and are designed to give you more Pure Virgin Analog pickup tones than anything on the planet.

"We are known for creating Dozens and Dozens of the very best pickup tones in the world. You could be known for using them."
