

FOR IMMEDIATE RELEASE

AweSome Musical Instruments Releases Les Paul Upgrade That Gives You 68 Pickup Tones

Detroit, Michigan, December 22, 2013

AweSome Musical Instruments has released **an upgrade for Les Paul style guitars** with two 4-wire humbucker pickups to give you 68 pickup tones. It gives you over three times more pickup tones than the “Jimmy Page” mod and is a much easier to install and use.

The upgrade pictured is an Epiphone Les Paul Standard model guitar. The stock two 2-wire humbucker pickups were removed and replaced with two 4-wire humbucker pickups. The AweSome **T4 Pickup Switch Upgrade™** now gives you a whopping 68 pickup tones.

The lower Volume and Tone controls were permanently removed to free up the needed body cavity space for the upgrade. One Volume and Tone control is a simpler way manage all the pickup coils. The 3-way switch no longer functions, but it was not removed so the guitar appeared more “stock.”

This upgrade product lets you get virtually every pickup tone ever created on your upgraded guitar: Blues, Jazz, Metal, Surf, Country, Glass-Shattering Tin-Canny, and dozens of additional pickup tones.

This upgrade also **gives you the Signature Sound of all the guitar gods** since the 1940s.

The intermediate difficulty level for installing this upgrade requires using a soldering iron, hand tools, an electric drill, ohmmeter, and be able to follow pictorial diagrams and schematics. Piezoelectric pickups or active (i.e., battery powered) pickups cannot be used with this upgrade.

Who We Are

AweSome Musical Instruments has a growing family of *high performance* patented **Pickup Switch Upgrade™** products that will give you access to all of the additional pickup tones that are *silently* hiding in your electric guitar or bass. These incredible products will let you upgrade hundreds of electric guitar and bass models, to give you up to **68 pure analog pickup tones** from your instruments.

Your upgraded guitar will give you the sounds of all those guitar gods of every headliner group since the 1940s. These products are proudly made in the U.S.A. – and **they will give you amazing tones without changing your pickups**. We are the only company that makes the ordinary – *extraordinary*.

We have been inventing the future for all electric guitar and bass players by creating AweSome Upgrade products that give you more pure analog *pickup tone power* than anything on earth. All of our products are proudly designed and made in the U.S.A.

You can get more information about these incredible products at: www.AweSome-Guitars.com

"Our products are the Swiss Army Knife of pickup tones."

We're not just light years ahead of everyone; we are completely in the next galaxy.
