

FOR IMMEDIATE RELEASE

AweSome “Life-T” Next Generation Guitar Gives You 35 Pickup Tones

Detroit, Michigan, December 29, 2014

AweSome Musical Instruments has released their *Next Generation* “Life-T” guitar model. Sporting the familiar Tele-style body shape, it has several features no one else offers. This includes a maple neck with modern “C” profile and satin finish, compound-radius maple fingerboard with 21 frets with iridescent white pearloid inlays, no-load tone control, long-life Kill Switch, plus an incredible range of **35 pickup tones** that no one else offers. This guitar will breathe new *Life* into your passion for playing.

This “Life-T” guitar also gives you **TroikaBucker™** pickup tones that no other company offers. Now you can put all three pickups in series to get heavy metal tones so “Fat”, they're obese. You also get incredible intense country twang tones that can *punch out windows at 30 paces*.

Owning a “Life-T” guitar **is like having up to a dozen unique guitars all rolled into one**. It gives you the classic sounds you would expect from a Stratocaster, Telecaster, Les Paul, PRS, as well as every other electric guitar ever made. This will be the only guitar you will be taking out of the rack.

Now you can get all the following pickup tones with one AweSome “Life-T” guitar:

Blues, Jazz, Metal, Surf, intense Country twang, glass-shattering pickup tones and dozens of additional subtle pickup tones in between!

The “Life-T” Electric Guitar also gives you the **Signature Sounds** of most **ALL the guitar gods** since the 1940s. These guitars are for serious players who want quality sound flexibility.

When you perform on stage, this “Life-T” guitar gives you dozens of unique and exciting pickup tones that nobody else has. Your six strings will sound better than you ever thought possible.

Used in the studio, the “Life-T” guitar gives you a huge spectrum of 35 unique pickup tones that you just cannot get with “stock” instruments. Now you can lighten your load with fewer guitars in tow.

When on tour, the maple fretboard keeps your instrument from being confiscated by a third-world country petty tyrant bureaucrat who may think your instrument contains “protected” rosewood.

The “Life-T” guitar has several stock features; including a long-life kill switch, quality Bourns no-load tone control, 35 pickup tones not available from any other instrument.

Who We Are

AweSome Musical Instruments has numerous **Pickup Switch Upgrade™** products for electric guitar and bass to give you more pure analog pickup tones from your stock instruments. Our upgrade products are made in the U.S.A. They don't need batteries, come with a Lifetime Warranty and *they will give you amazing tones without changing your pickups.*

You can get more information at: www.AweSome-Guitars.com

"Our products are the Swiss Army Knife of pickup tones."
